State	Is student-level test score information maintained at the SEA?	Is the SEA able to connect this year's performance data at the student level to previous years' performance data?	Can the SEA measure year-to-year academic growth for individual students in any subject?	When was the first year the student-level assessment data were available for all students?	If not already collected, does the SEA have plans to maintain student-level test score data?	Planned Implementation Date
